Senior Full Stack Developer IIoT/ Industry 4.0 (m/f/d)

Your Job

- As a full-stack developer, you will actively work on projects, program applications and extensions with Java and JavaScript, model user interfaces (GUI) and implement interfaces to SQL and NoSQL databases and external systems.
- You record and analyze customer requirements, work out individual solution concepts and bring them to the team. You will inspire our customers by presenting our innovations and discussing technical solutions.
- You will be responsible for projects, support the project team, promote collaboration and keep an eye on the entire development process.

Your Benefits

- Flexible working time models with mobile office option
- 32 days annual leave
- Long-term perspective with exciting tasks
- Strong and open team
- Actively involved and supportive CEOs
- Many opportunities to help shape the company
- Freedom for personal and professional development
- Modern, spacious office with a great roof terrace and beach chair
- Regular events
- Many attractive benefits – free drinks, food discounts, fitness, free parking and much more.

Your Know-how

- You have successfully completed your studies in computer science or a comparable training and have experience in the development of Java/ JavaScript/ C#/ .NET applications.
- You may already have experience in the technical management of a project team or are eager to master this as a new challenge.
- You enjoy understanding the challenges of our customers and generating innovative solutions from them.
- You enjoy familiarizing yourself with new technologies and are enthusiastic about topics such as IoT and Industry 4.0.
- As a team player, you bring flexibility and organizational strength. A high level of quality awareness, an independent and structured way of working and business fluent German and English complete your profile.
