## Working student software development IIoT (m/f/d)

### Your Job

- You work in research projects and customer projects on the development of object-oriented software in classic, agile and hybrid process models.
- Your work includes the design, programming, testing and documentation of software solutions.
- You will support our development team and take on exciting project tasks independently.
- You will document the results and organize the transfer of knowledge to the team.

### Your Benefits

- Flexible working hours of up to 20 hours per week with the option of a mobile office – so that your job fits in well with your studies!
- Option to write your thesis and permanent position after graduation – plan your future with Software Factory!
- Strong and open team – the colorful WE is important to us!
- Actively collaborating and supportive CEOs – good cooperation is a top priority!
- Many opportunities to help shape the company – make Software Factory your company!
- Freedom for personal and professional development – we'll see where we're going together!
- Modern, spacious office with a great roof terrace and beach chair – feel at home with us!
- Regular events – the boss barbecues for the team!
- Lots of attractive benefits – free drinks, meal discounts, free parking and much more

### Your Know-how

- Preferably you are enrolled in a degree program in computer science or similar.
- You have initial knowledge of one of the following programming languages: Java/ JavaScript/ C#/ .NET.
- You have a desire to learn new things, enjoy working with new technologies and are enthusiastic about topics such as IIoT and Industry 4.0.
- You enjoy working independently, have a talent for organization and very good German and good English skills.
